Software Engineer and Computer Scientist

Software engineer with over 7 years of experience in backend platforms, distributed cloud infrastructure and academic research. Highly adaptable to new technologies and concepts. Experienced in the deliberate use of AI to boost productivity without sacrificing quality. A committed advocate for software architecture and testing. Values working in teams whose members support and learn from each other.

PROFESSIONAL EXPERIENCE

Backend Software Engineer

Babbel GmbH, Germany

NOVEMBER 2022 – JUNE 2026

- Maintained and extended the content platform (TypeScript, Go and Ruby codebases; deployed to AWS Lambda, DynamoDB, S3, Kinesis and ECS via Terraform).
- Integrated the content platform with Databricks, enabling new AI-based features to leverage Babbel's rich learning content.
- Improved reliability by introducing Service Level Objectives (SLOs).
- Streamlined workflows by improving CI and monorepo tooling.
- Led a tiger team building the first personalized learning experience.
- Mentored a colleague through their progression from Professional to Senior Engineer.

Professional: Nov 2022 – Apr 2024. Senior: May 2024 – Jun 2026.

Research Associate

Technische Universität Berlin, Germany

NOVEMBER 2018 – JUNE 2022

- Organized four courses with up to 750 participants.
- Conducted research on programming languages for deep learning.
- Supervised four successfully completed bachelor's theses.
- Secured research funding for a project with an industry partner.
- Ad-hoc integration of various university systems using Python and SQLite.

Student Research Assistant

Universidade Federal do Rio Grande do Sul, Porto Alegre, Brazil

MARCH 2016 – AUGUST 2018

- Research on formal methods and model transformations.
- Developed an open-source system for graph transformations.
- Improved the system's architecture.
- Introduced CI with unit tests and coverage metrics.

Software Developer

Inetsoft Informática, Porto Alegre, Brazil

MAY 2015 – MARCH 2016

- Frontend development with JavaScript, RxJS and CycleJS.
- Integrated the web frontend into a C++-based GUI using CEF.

Student Research Assistant

Technische Universität Berlin

SEPTEMBER 2014 – MARCH 2015

- Research on formal methods: theorem proving for embedded software.

Student Research Assistant

Universidade Federal do Rio Grande do Sul

AUGUST 2010 – JULY 2012

- Developed intelligent agents for traffic simulation using Python.
- Research on traffic planning and simulation.

EDUCATION

M.Sc. Computer Science 2016–2018

Universidade Federal do Rio Grande do Sul

B.Sc. Computer Science 2010–2015

Technische Universität Berlin and Universidade Federal do Rio Grande do Sul (double degree program)

SKILLS

JavaScript / TypeScript
Ruby
Python
Go
Haskell
Java
Scala
Rust
AWS Cloud
GitHub CI
Terraform
SQL
Docker
Nix
Technical writing

LANGUAGES

German, fluent
English, fluent
Portuguese, native
Spanish, good working knowledge

HOBBIES & INTERESTS

Musical theatre
Smart home / smart lighting
Tabletop role-playing games
